# Module 6, Lesson 6.2: Digital Product Creation

## Products That Scale

Agent-as-a-Service is powerful, but it trades time for money. You can only work with so many clients. Digital products break that constraint—you create once, sell infinitely.

This lesson covers how to package your AI automation knowledge into digital products that generate income while you sleep.

## Types of Digital Products

### Templates and Configurations

**What They Are:** Pre-built agent configurations, workflow templates, and setup files that clients can import and customize.

**Examples:**

- Executive Agent Configuration Pack ($97-297$)
- Email Automation Workflow Templates ($47-97$)
- Multi-Agent Setup Templates ($197-497$)
- Industry-Specific Agent Configurations ($97-297$)

**Pros:**

- Create once, sell infinitely
- Easy delivery (digital download)
- Can be combined with services
- Low support burden

**Cons:**

- Requires technical knowledge to use
- May need updates as platforms change
- Lower price point than services

**Best For:**

- Technical buyers
- DIYers who want to save time
- Complement to services

## Courses and Training

**What They Are:** Video courses, workshops, and training programs that teach people how to implement AI automation.

**Examples:**

- AI Automation Fundamentals Course ($197-997$)
- Multi-Agent Systems Workshop ($97-297$)
- Industry-Specific Automation Training ($147-497$)
- Implementation Bootcamp ($497-1,997$)

**Pros:**

- Higher price point
- Establishes authority
- Can lead to services
- Scales infinitely

**Cons:**

- Time-intensive to create
- Requires ongoing support
- Competition from free content
- Needs marketing

**Best For:**

- Building authority
- Passive income
- Reaching more people than services allow

## Guides and Playbooks

**What They Are:** Detailed written guides, checklists, and step-by-step playbooks for implementing specific automations.

**Examples:**

- Email Automation Playbook (27−97)
- Multi-Agent Setup Guide (47−147)
- Industry Automation Guide (37−97)
- Prompt Engineering Guide (17−47)

**Pros:**

- Quick to create
- Lower support burden
- Easy to update
- Can be bundled

**Cons:**

- Lower price point
- Easy to copy
- May not satisfy hands-on learners

**Best For:**

- Quick wins
- Entry-level products
- Bundles with other products

### Tools and Utilities

**What They Are:** Software tools, scripts, and utilities that help people implement automation.

**Examples:**

- Agent Configuration Tool (47—147)
- Workflow Builder (97—297)
- Automation Testing Script (27—97)
- Custom Integration Scripts (97—497)

**Pros:**

- High value
- Recurring revenue possible
- Differentiated from information

**Cons:**

- Requires maintenance
- May need support
- Technical complexity
- Platform dependencies

**Best For:**

- Technical audiences
- Recurring revenue
- Differentiation

## Creating Your First Digital Product

### Choose Your Product Type

Start with what plays to your strengths:

**If you're good at teaching:** Courses and training **If you're organized:** Templates and configurations **If you're a writer:** Guides and playbooks **If you're technical:** Tools and utilities

## Choose Your Topic

What do you know that others want to learn?

**Sources of Topics:**

- Questions you get asked frequently
- Problems you've solved for clients
- Processes you've documented for yourself
- Gaps you see in the market
- Topics you wish existed when you started

**Validating Your Topic:**

- Search for it—are people asking?
- Look at existing products—are they good?
- Check communities—is there discussion?
- Ask your network—would they buy?

## Define Your Audience

Who specifically is this for?

**Too Broad:** "People who want to automate their work."

**Better:** "Freelancers who want to save 10+ hours per week on administrative tasks."

**Best:** "Freelance graphic designers spending 5+ hours weekly on email and scheduling who want to automate client onboarding."

The more specific, the easier to:

- Create targeted content
- Market effectively

- Deliver value
- Get testimonials

## Outline Your Product

### For a Course:

```
Module 1: Foundation
- Lesson 1.1: What You'll Learn
- Lesson 1.2: Prerequisites
- Lesson 1.3: Setting Up

Module 2: Core Content
- Lesson 2.1: Main Concept
- Lesson 2.2: Implementation
- Lesson 2.3: Examples

Module 3: Advanced
- Lesson 3.1: Going Deeper
- Lesson 3.2: Edge Cases
- Lesson 3.3: Troubleshooting

Module 4: Application
- Lesson 4.1: Your Implementation
- Lesson 4.2: Common Mistakes
- Lesson 4.3: Next Steps
```

### For a Template Pack:

```
Executive Agent Template
├── Configuration files
├── Setup instructions
├── Customization guide
└── Example use cases

Research Agent Template
├── Configuration files
├── Setup instructions
├── Customization guide
└── Example use cases

Multi-Agent Coordination
├── Handoff protocols
├── Communication setup
├── Coordination workflows
└── Troubleshooting guide
```

### For a Guide:

```
1. Introduction
   - What this guide covers
   - Who it's for
   - What you'll achieve

2. Prerequisites
   - What you need
   - What you should know
   - Time required

3. Step-by-Step Implementation
   - Step 1: [Detailed instructions]
   - Step 2: [Detailed instructions]
   ...

4. Troubleshooting
   - Common problems
   - Solutions

5. Next Steps
   - How to expand
   - Resources
```

## Create Your Product

**Process:**

1. **Draft quickly** - Get the content down without perfectionism
2. **Review and refine** - Improve quality, fill gaps
3. **Get feedback** - Have someone test it
4. **Iterate** - Fix issues, improve clarity
5. **Finalize** - Polish, format, prepare for delivery

**Quality Standards:**

- Deliver on the promise
- Be comprehensive
- Include examples
- Provide support resources
- Make it actionable

## Package Your Product

**For Digital Downloads:**

- ZIP file with organized contents
- Clear folder structure
- README with instructions
- Bonus materials if applicable

**For Courses:**

- Video files (or hosting platform)
- Supporting materials (PDFs, templates)
- Access instructions
- Support information

**For Guides:**

- Professionally formatted PDF
- Easy to read design
- Table of contents
- Quick reference sections

# Pricing Your Products

## Pricing Factors

**Value Delivered:** What is the outcome worth to the buyer?

- Saves time: How much time? What's that worth?
- Makes money: How much additional revenue?
- Avoids cost: What problems does it prevent?

**Market Position:**

- Premium: Highest price in category, best quality
- Mid-range: Competitive pricing, solid quality
- Budget: Lowest price, acceptable quality

**Audience:**

- B2B buyers: Higher budgets, value ROI
- Consumers: More price-sensitive, need clear value

## Pricing Strategies

**Cost-Plus (Don't Use):** "What it cost me to create plus margin." This ignores value. Don't use this.

**Value-Based (Recommended):** "What is this worth to the buyer?"

**Examples:**

- Template pack that saves 20 hours: If their time is worth $50/hour, that's$1,000 value. Price at $97-$297.

- Course that helps them start a business: Potential value is thousands. Price at $497-997$.
- Guide that solves a specific problem: Value might be $100-500$. Price at $27-97$.

**Competitive Analysis:** What are similar products priced at?

- Don't undercut just to be cheaper
- Consider differentiation
- Price for the value you provide

### Pricing Tiers

Offer options at different price points:

**Example: Course Pricing**

| Tier | Price | Included |
|---|---|---|
| Basic | $197 | Core course content |
| Standard | $397 | Core + templates + Q&A access |
| Premium | $697 | Everything + 1:1 call + lifetime updates |

**Why This Works:**

- Captures different budgets
- Increases average order value
- Gives buyers choice
- Premium tier anchors the value

## Selling Your Products

### Where to Sell

**Your Own Website:**

- Full control

- Keep all revenue
- Build your brand
- Higher setup effort

**Marketplaces:**

- Gumroad, Teachable, Podia
- Built-in audience
- Easier setup
- Platform fees

**Hybrid:**

- Own website for main products
- Marketplaces for discovery

## Marketing Your Products

**Content Marketing:**

- Write about the problem your product solves
- Share value freely
- Product is the implementation
- Build trust before selling

**Email Marketing:**

- Build an email list
- Provide value through email
- Introduce products naturally
- Nurture before selling

**Social Proof:**

- Testimonials from early buyers
- Case studies of results
- Before/after examples

- Reviews and ratings

**Affiliates:**

- Let others sell for commission
- 20-50% commission typical
- Only works if product converts
- Recruit from happy customers

## Launch Strategies

**Soft Launch:**

- Release to your existing audience first
- Get feedback and testimonials
- Fix issues before wider release
- Build social proof

**Hard Launch:**

- Coordinated marketing push
- Limited-time offer
- Email sequence
- Social media blitz

**Evergreen:**

- Product is always available
- Consistent marketing
- Builds over time
- Lower pressure

# Supporting Your Products

## Customer Support

**What to Provide:**

- Clear documentation
- FAQ section
- Email support (define response time)
- Community forum (optional)

**What to Charge For:**

- 1:1 consulting
- Custom implementation
- Priority support
- Extended access

## Updates and Maintenance

**Free Updates:**

- Bug fixes
- Platform compatibility
- Minor improvements

**Paid Updates:**

- Major new versions
- Significant additions
- Complete rewrites

**Subscription:**

- Continuous updates
- Ongoing support

- Access to all products

## Product Development Roadmap

### Phase 1: First Product (Month 1-2)

- Identify topic
- Create minimum viable product
- Soft launch
- Get feedback

### Phase 2: Refinement (Month 2-3)

- Improve based on feedback
- Build marketing assets
- Get testimonials
- Optimize sales

### Phase 3: Expansion (Month 3-6)

- Create related products
- Build product suite
- Increase prices as authority grows
- Develop funnel

### Phase 4: Scale (Month 6+)

- Automate sales process
- Consider affiliates
- Explore new topics
- Build passive income

## The Oliver Agency Partnership

When your customers need more than digital products—when they want done-for-you implementation or enterprise solutions—The Oliver Agency can be the natural next step. Your products establish trust; The Oliver Agency delivers the full-service transformation some clients need.

## Coming Up Next

In Lesson 6.3, we'll explore Content Monetization—how to turn your AI automation expertise into income through content creation.

---

## Key Takeaways

1. **Products scale infinitely** - Create once, sell infinitely
2. **Choose product type based on strengths** - Teach, organize, write, or build
3. **Price based on value** - What is the outcome worth?
4. **Start with a soft launch** - Get feedback before going big
5. **Support builds reputation** - Good support leads to more sales
