Question 5

When should you move something to Archives?

A) Never - Archives are not useful B) When it’s no longer actively needed C) Immediately after creating it D) Only at the end of each year

---

Answers

Question 1: B PARA stands for Projects, Areas, Resources, Archives - organizing information by how actionable it is.

Question 2: C Information flows from most actionable (Projects) to least actionable (Archives). As things become less active, they move down the hierarchy.

Question 3: A Projects have clear goals and endpoints (like “launch website”), while Areas are ongoing responsibilities without end dates (like “Health” or “Finances”).

Question 4: C Resources is where you store topics of interest, reference materials, and things you’re learning about that don’t have immediate action items.

Question 5: B Move items to Archives when they’re no longer actively needed - completed projects, inactive areas, or old resources you want to keep but don’t need now.
