A) To store completed projects B) To store ongoing responsibilities and their goals/tracking C) To store email attachments D) To store temporary files

---

Answers

Question 1: B Your PARA structure should be created in your OpenClaw workspace directory so your AI agent can navigate and use it.

Question 2: C AGENTS.md is where you tell your agent about your PARA organization, including how to navigate and use each folder.

Question 3: B A project template should include standard files like notes.md, tasks.md, and a resources folder to maintain consistency across projects.

Question 4: B Regular weekly or monthly reviews help you move completed projects to Archives, update Areas, and maintain the system.

Question 5: B Areas folders store ongoing responsibilities like Health, Finances, and Career, including goals and tracking for each area.
