Quiz: Module 3, Lesson 3.4 - Daily Notes & Long-Term Memory

Questions

Question 1

What are daily notes?

A) Notes you write by hand each day B) Auto-created files that capture session activity and provide recent context C) The same as long-term memory D) Notes sent to you via email

Question 2

What type of information belongs in MEMORY.md?

A) Everything from every conversation B) Only temporary data C) Key facts, preferences, decisions, and ongoing projects that should persist D) Other people's private information

Question 3

How can you explicitly add information to long-term memory?

A) It happens automatically with everything B) Using the "Remember this:" command C) By restarting OpenClaw D) By writing it on paper

Question 4

What is a recommended practice for maintaining long-term memory?

A) Never review or update it B) Periodically review, clean up outdated information, and update important details C) Delete everything weekly D) Copy it to multiple locations

Question 5

What happens when you start a new session with your AI agent?

A) It starts with no memory B) It loads configuration files, MEMORY.md, and recent daily notes C) It remembers everything forever D) It only remembers what you explicitly typed

---

Answers

Question 1: B Daily notes are auto-created files in the memory/ folder that capture what happened during each session, providing recent context when you start a new session.

Question 2: C MEMORY.md should store key facts about you, your preferences, important decisions and their reasoning, and ongoing projects - information that should persist between sessions.

Question 3: B You can explicitly add information to long-term memory by using phrases like “Remember this:” followed by the information you want stored.

Question 4: B Regular reviews help maintain memory quality by removing outdated information, updating changed details, and ensuring important information is captured.

Question 5: B When starting a new session, your agent loads configuration files for rules, MEMORY.md for persistent context, and recent daily notes for continuity.
