A) Newsletter subscriptions B) Promotional emails C) Emails from VIP contacts and sensitive topics D) Calendar invites

Question 4

What is the key benefit of email categorization?

A) It makes emails look better B) It allows different automation levels for different email types C) It increases the number of emails D) It replaces the need for folders

Question 5

What metric should you track to measure email automation success?

A) Number of emails deleted B) Time saved, inbox management, and automation rate C) How fast the AI responds D) Number of templates created

---

Answers

Question 1: B Start with read-only access to build trust. Let the AI summarize and categorize before allowing it to send on your behalf.

Question 2: B The three levels are Intelligence (read and summarize), Assistance (draft and organize), and Automation (handle routine automatically).

Question 3: C Emails from VIP contacts and sensitive topics (complaints, contracts, personnel matters) should always require human attention.

Question 4: B Email categorization enables different automation levels - routine emails can be automated, while important emails get human attention.

Question 5: B Track time saved, inbox management metrics (unread emails, response time), and automation rate to measure success.
